# The Death of Lord Nelson

AND

*Several interesting anecdotes.*

By *William Beatty*, M.D.

Surgeon to the Victory in the Battle of Trafalgar, and now Physician to the Fleet under the Command of the Earl of St. Vincent, K.B. &c. &c. &c.

London:

Printed By T. Davison, White-Friars;

For T. Cadell and W. Davies, in the Strand.

1807.

*TO THE PUBLIC.*

The Surgeon of the late illustrious Lord *Nelson* feels himself called upon, from the responsible situation which he held on the eventful day of the 21st of October 1805, to lay before the British Nation the following Narrative. It contains an account of the most interesting incidents which occurred on board the Victory. (Lord NELSON's flag-ship) from the time of her sailing from England, in the month of September, till the day of battle inclusively; with a detail of the particulars of *his* LORDSHIP'S Death, the mode adopted for preserving his revered Remains during the subsequent long passage of the Victory to England, and the condition of the Body when it was deposited in Greenwich Hospital. This short statement of facts is deemed a small but necessary tribute of respect to the memory of the departed Hero, as well as a professional document which the Public had a right to expect from the man who had the melancholy honour of being his principal medical attendant on that occasion: and is presumed to be not unappropriately concluded by observations on the state of *his* LORDSHIP'S health for some time previous to his fall; with his habits of life, and other circumstances, strongly proving that few men had a greater prospect of attaining longevity, on which account his premature death is the more to be deplored by his Country.

It was originally intended that this Narrative should be published in the *life of Lord Nelson*, undertaken by the Rev. J.S. *Clarke* and J. M'ARTHUR, Esq. and it will still form a part of that Work; but from the length of time which must necessarily elapse before so extensive and magnificent a Publication can be completed, the Author has been induced to print it in a separate form.

Narrative

Lord *Nelson* sailed from St. Helen's in the Victory, with the *Euryalus* frigate, on the morning of the 15th of September 1805, to take the command of the British Fleet cruising before Cadiz. On the 18th he appeared off Plymouth; where he was joined by his Majesty's ships *Thunderer* and *Ajax*, with which he proceeded for his destined station. On the 20th he communicated by private signal with the squadron under the command of Rear-Admiral *Stirling*, which passed within a few miles of the Victory; and the same day at noon, spoke his Majesty's ship *Le Decade*, having on board Rear-Admiral Sir *Richard Bickerton*, who, was on his return to England for the recovery of his health.

Some bad weather and adverse winds were experienced by the Victory in crossing the Bay of Biscay, and on the 27th Cape St. Vincent was seen. Lord *Nelson* had dispatched the Euryalus ahead on the preceding day, to acquaint Admiral *Collingwood* with his approach; and to direct that no salute should take place, nor any public compliments be paid to his flag, on his assuming the command, as he wished the Enemy to be kept ignorant of a reinforcement being received by the British Fleet. In the evening of the 28th, the Victory joined the Fleet; now consisting of twenty-seven ships of the line, including the Victory, Ajax, and Thunderer: the city of Cadiz was seen distant about fifteen miles, with the Combined Fleets at anchor; and Admiral *Louis*, with five or six ships under his command, close in shore, watching the motions of the Enemy.

On the 29th, prompt and decisive measures were adopted to prevent the Enemy from receiving any supplies of provisions by sea, which His *Lordship* was informed they were very much distressed for: cruizers were stationed off the Capes St. Vincent, St. Mary's, and Trafalgar; and the frigates Euryalus and Hydra were ordered to keep off the entrance of Cadiz. His *Lordship* now retired with the Fleet to the vicinity of Cape St. Mary's, about fifty or sixty miles westward of Cadiz; keeping up a constant communication with the frigates in shore, by means of three or four ships of the line placed at convenient intervals for distinguishing the signals of each other. This distance from, the Enemy's port was preserved by His *Lordship*, to prevent them from being speedily acquainted with the force of the Fleet under his command; and that he might avoid the necessity of bearing up in bad weather, and running with the Fleet through the Straits of Gibraltar when the westerly gales prevailed: as the inconvenience of being forced into the Mediterranean, had been felt by former Commanders in Chief; and would now have afforded a favourable opportunity to the Enemy of effecting their escape from Cadiz, or at all events have rendered their obtaining supplies less difficult.

On the 1st of October Admiral *Louis* joined the Fleet, with a part of his squadron (the Canopus, Spencer, and Tigre), from before Cadiz; and departed the next day with those ships, the Queen, and the Zealous, for Gibraltar, to procure a supply of provisions, stores, and water, which they were much in want of. On the 4th he rejoined with his squadron; having received intelligence from the Euryalus by telegraph, that the French ships in Cadiz were embarking their troops, and preparing to sail. Lord *Nelson* however conceived this to be merely intended as a stratagem, to draw him nearer to Cadiz, for the purpose of obtaining a knowledge of his force; and therefore directed Admiral *Louis* to proceed in the execution of the orders before delivered to him.

Between the 7th and the 13th, His *Lordship* was reinforced by the Royal Sovereign, Belleisle, Defiance, Agamemnon, and Africa, from England, and the Leviathan from Gibraltar. The Agamemnon, Sir *Edward Berry*, joined on the 13th;[1] with intelligence that she had been chased on the coast of Portugal a few days before by an Enemy's squadron, consisting of six sail of the line.

On the 13th in the evening, Sir *Robert Calder*, in his Majesty's ship the Prince of Wales, parted company with the Fleet, on his return to England. His departure Lord *Nelson* had some days before evinced an anxious wish to procrastinate, and was heard that very day to declare his firm belief that the Combined Fleets would be at sea in the course of ten days or a fortnight.[2]

On the 18th the Donegal, Captain *Malcolm*, left the Fleet for Gibraltar. On the 19th his Majesty's ships the Colossus, Mars, Defence, and Agamemnon, formed the cordon of communication with the frigates in shore: the Fleet was lying to. About half past nine in the morning, the Mars, being one of the ships nearest to the Fleet, repeated the signal from the ships further in shore, that "the Enemy were coming out of port." Lord *Nelson* immediately ordered the general signal to be made, with two guns, for a chase in the south-east quarter. The wind was now very light; and the breezes partial, mostly from the south-south-west. The Fleet made all possible sail; and about two o'clock the Colossus and Mars repeated signals from the ships in shore, communicating the welcome intelligence of "the Enemy being at sea." This cheered the minds of all on board, with the prospect of realizing those hopes of meeting the Enemy which had been so long and so sanguinely entertained. It was well known to His *Lordship*, that all the Enemy's ships had the iron hoops on

their masts painted black; whereas the British ships, with the exception of the *Belleisle* and *Polyphemus*, had theirs painted yellow: and as he considered that this would serve for a very good mark of distinction in the heat of battle, he made known this circumstance to the Fleet, and ordered the *Belleisle* and *Polyphemus* to paint their hoops yellow; but the evening being far advanced when the signal was made to them for this purpose, His *Lordship*, fearing that it might not be distinctly understood, sent the *Entrepenante* cutter to them to communicate the order.

During the night the Fleet continued steering to the south-east under all sail, in expectation of seeing the Enemy; and at day-break on the 20th found itself in the entrance of the Straits of Gibraltar, but nothing of the Enemy to be discovered. The Fleet now wore, and made sail to the north-west; and at seven in the morning the *Phoebe* was seen making signals for "the Enemy bearing north." At eight o'clock the *Victory* hove to; and Admiral *Collingwood*, with the Captains of the *Mars*, *Colossus*, and *Defence*, came on board, to receive instructions from His *Lordship*; at eleven minutes past nine they returned to their respective ships, and the Fleet made sail again to the northward.

In the afternoon the wind increased, and blew fresh from the south-west; which excited much apprehension on board the *Victory*, lest the Enemy might be forced to return to port. The look-out ships, however, made several signals for seeing them, and to report their force and bearings. His *Lordship* was at this time on the poop; and turning round, and observing a group of Midshipmen assembled together, he said to them with a smile, "This day or to-morrow will be a fortunate one for you, young men," alluding to their being promoted in the event of a victory.

A little before sunset the *Euryalus* communicated intelligence by telegraph, that "the Enemy appeared determined to go to the westward." His *Lordship* upon this ordered it to be signified to Captain *Blackwood* (of that ship) by signal, that "he depended on the *Euryalus* for keeping sight of the Enemy during the night." The night signals were so clearly and distinctly arranged by His *Lordship*, and so well understood by the respective Captains, that the Enemy's motions continued to be made known to him with the greatest facility throughout the night: a certain number of guns, with false fires and blue lights announced their altering their course, wearing, and making or shortening sail; and signals communicating such changes were repeated by the look-out ships, from the *Euryalus* to the *Victory*.

The Enemy wore twice during the night: which evolution was considered by His *Lordship* as shewing an intention, on their part, of keeping the port of Cadiz open; and made him apprehend that on seeing the British Fleet, they would effect their retreat thither before he could bring them to a general action. He was therefore very careful not to approach their Fleet near enough to be seen by them before morning.

The British Fleet wore about two o'clock in the morning; and stood on the larboard tack with their heads to the northward, carrying their topsails and foresails, and anxiously expecting the dawn of day. When that period arrived, the Combined Fleets were distinctly seen from the *Victory*'s deck, formed in a close line of battle ahead on the starboard tack, standing to the south, and about twelve miles to leeward. They consisted of thirty-three ships of the line; four of which were three-deckers, and one of seventy guns: the strength of the British Fleet was twenty-seven ships of the line; seven of which were three-deckers, and three of sixty-four guns. Lord *Nelson* had, on the 10th, issued written Instructions to the Admirals and Captains of the Fleet individually, pointing out his intended mode of attack in the event of meeting the Enemy;[3] and now, previously to appearing himself on deck, he directed Captain *Hardy* to make the necessary signals for the order and disposition of the Fleet accordingly.

His *Lordship* came upon deck soon after day-light: he was dressed as usual in his Admiral's frock-coat, bearing on the left breast four stars of different orders which he always wore with his common apparel.[4] He displayed excellent spirits, and expressed his pleasure at the prospect of giving a fatal blow to the naval power of France and Spain; and spoke with confidence of obtaining a signal victory notwithstanding the inferiority of the British Fleet, declaring to Captain *Hardy* that "he would not be contented with capturing less than twenty sail of the line." He afterwards pleasantly observed that "the 21st of October was the happiest day in the year among his family," but did not assign the reason of

this.[5] His *Lordship* had previously entertained a strong presentiment that this would prove the auspicious day; and had several times said to Captain *Hardy* and Doctor *Scott* (Chaplain of the ship, and Foreign Secretary to the Commander in Chief, whose intimate friendship he enjoyed), "The 21st of October will be our day."

The wind was now from the west; but the breezes were very light, with a long heavy swell running. The signal being made for bearing down upon the Enemy in two lines, the British Fleet set all possible sail. The lee line, consisting of thirteen ships, was led by Admiral *Collingwood* in the Royal Sovereign; and the weather line, composed of fourteen ships, by the Commander in Chief in the *Victory*. *His Lordship* had ascended the poop, to have a better view of both lines of the British Fleet; and while there, gave particular directions for taking down from his cabin the different fixtures, and for being very careful in removing the portrait of Lady *Hamilton*: "Take care of my Guardian Angel," said he, addressing himself to the persons to be employed in this business. Immediately after this he quitted the poop, and retired to his cabin for a few minutes: where he committed to paper the following short but devout and fervent ejaculation, which must be universally admired as truly characteristic of the Christian hero; and the codicil to his will, which follows it:

"*May the great god* whom I worship grant to my Country, and for the benefit of Europe in general, a great and glorious victory; and may no misconduct in any one tarnish it, and may humanity after victory be the predominant feature in the British Fleet! For myself individually, I commit my life to Him that made me; and may His blessing alight on my endeavours for serving my Country faithfully! To Him I resign myself, and the just cause which is entrusted to me to defend. Amen, Amen, Amen."

\* \* \* \* \*

"October 21st, 1805. Then in sight of the Combined Fleets of France and Spain, distant about ten miles.

"Whereas the eminent services of *Emma Hamilton*, widow of the Right Honourable Sir *William Hamilton*, have been of the very greatest service to my King and Country, to my knowledge, without ever receiving any reward from either our King or Country:

"First, that she obtained the King of Spain's letter, in 1796, to his brother the King of Naples, acquainting him of his intention to declare war against England; from which letter the ministry sent out orders to the then Sir *John Jervis*, to strike a stroke if opportunity offered, against either the arsenals of Spain or her fleets:---that neither of these was done, is not the fault of Lady *Hamilton*; the opportunity might have been offered:[6]

"Secondly: the British Fleet under my command could never have returned the second time to Egypt, had not Lady HAMILTON'S influence with the Queen of Naples caused letters to be wrote to the Governor of Syracuse, that he was to encourage the Fleet's being supplied with every thing, should they put into any port in Sicily. We put into Syracuse, and received every supply; went to Egypt, and destroyed the French Fleet:

"Could I have rewarded these services, I would not now call upon my Country; but as that has not been in my power, I leave *Emma Lady Hamilton* therefore a legacy to my King and Country, that they will give her an ample provision to maintain her rank in life.

"I also leave to the beneficence of my Country my adopted Daughter, *HORATIA Nelson Thompson*; and I desire she will use in future the

name of *Nelson* only.

"These are the only favours I ask of my King and Country, at this moment when I am going to fight their battle. May *god* bless my King and Country, and all those I hold dear! My Relations it is needless to mention: they will of course be amply provided for.

"*Nelson and Bronte.*

"Witness {*Henry Blackwood.*  
{T.M. Hardy"

The prayer and codicil were both written with *his* LORDSHIP'S own hand, within three hours before the commencement of the engagement.

As the *Victory* drew near to the Enemy, *his Lordship*, accompanied by Captain *Hardy*, and the Captains of the four frigates (*Euryalus*, *Naiad*, *Sirius*, and *Phoebe*) who had been called on board by signal to receive instructions, visited the different decks of the ship. He addressed the crew at their several quarters, admonishing them against firing a single shot without being sure of their object; and expressed himself to the Officers highly satisfied with the arrangements made at their respective stations.

It was now plainly perceived by all on board the *Victory*, that from the very compact line which the Enemy had formed, they were determined to make one great effort to recover in some measure their long-lost naval reputation. They wore in succession about twenty minutes past seven o'clock; and stood on the larboard tack, with their heads toward *Cadiz*. They kept a good deal of sail set; steering about two points from the wind, with topsails shivering. Their van was particularly closed, having the *Santissima Trinidad* and the *Bucentaur* the ninth and tenth ships, the latter the flag-ship of Admiral *Villeneuve*: but as the Admirals of the Combined Fleets declined shewing their flags till the heat of the battle was over, the former of these ships was only distinguished from the rest by her having four decks; and Lord *Nelson* ordered the *Victory* to be steered for her bow.

Several Officers of the ship now communicated to each other their sentiments of anxiety for *his* LORDSHIP'S personal safety, to which every other consideration seemed to give way. Indeed all were confident of gaining a glorious victory, but the apprehensions for *his Lordship* were great and general; and the Surgeon made known to Doctor *Scott* his fears that *his Lordship* would be made the object of the Enemy's marksmen, and his desire that he might be entreated by somebody to cover the stars on his coat with a handkerchief. Doctor *Scott* and Mr. *Scott* (Public Secretary) both observed, however, that such a request would have no effect; as they knew *his* LORDSHIP'S sentiments on the subject so well, that they were sure he would be highly displeased with whoever should take the liberty of recommending any change in his dress on this account: and when the Surgeon declared to Mr. *Scott* that he would avail himself of the opportunity of making his sick-report for the day,[7] to submit his sentiments to the Admiral, Mr. *Scott* replied, "Take care, Doctor, what you are about; I would not be the man to mention such a matter to him." The Surgeon notwithstanding persisted in his design, and remained on deck to find a proper opportunity for addressing His *Lordship*; but this never occurred: as His *Lordship* continued occupied with the Captains of the frigates (to whom he was explaining his intentions respecting the services they were to perform during the battle) till a short time before the Enemy---opened their fire on the *Royal Sovereign*, when Lord *Nelson* ordered all persons not stationed on the quarter-deck or poop to repair to their proper quarters; and the Surgeon, much concerned at this disappointment, retired from the deck with several other Officers.[8]

The boats on the quarters of the ship, being found in the way of the guns, were now lowered, down, and towed astern. Captain *Blackwood*, of the *Euryalus*, remained on board the *Victory* till a few minutes before the Enemy began to fire

upon her. He represented to His *Lordship*, that his flag-ship would be singled out and much pressed by the Enemy; and suggested the propriety therefore of permitting one or two ships of his line to go ahead of the Victory, and lead her into action, which might be the means of drawing in some measure the Enemy's attention from her. To this Lord *Nelson* assented, and at half past nine o'clock he ordered the Temeraire and Leviathan by signal (the former of which ships, being close to the Victory, was hailed by His *Lordship*) to go ahead for that purpose; but from the light breeze that prevailed they were unable, notwithstanding their utmost efforts, to attain their intended stations. Captain *Blackwood* foresaw that this would be the case; and as the Victory still continued to carry all her sail, he wished Captain *Hardy* to acquaint His *Lordship*, that unless her sail was in some degree shortened, the two ships just mentioned could not succeed in getting ahead previously to the Enemy's line being forced: this however Captain *Hardy* declined doing, as he conceived His LORDSHIP'S ardour to get into battle would on no account suffer such a measure.[9]

About half an hour before the Enemy opened their fire, the memorable telegraphic signal was made, that "*England expects every man will do his duty*," which was spread and received throughout the Fleet with enthusiasm. It is impossible adequately to describe by any language, the lively emotions excited in the crew of the Victory when this propitious communication was made known to them: confidence and resolution were strongly portrayed in the countenance of all; and the sentiment generally expressed to each other was, that they would prove to their Country that day, how well British seamen *could* "do their duty" when led to battle by their revered Admiral. The signal was afterwards made to "prepare to anchor after the close of the day;" and union-jacks were hoisted at the fore-topmast and top-gallant-stays of each ship, to serve as a distinction from the Enemy's, in conformity with orders previously issued by the Commander in Chief. By his LORDSHIP'S directions also, the different divisions of the Fleet hoisted the St. George's or white ensign, being the colours of the Commander in Chief: this was done to prevent confusion from occurring during the battle, through a variety of national flags.

The Royal Sovereign now made the signal by telegraph, that "the Enemy's Commander in Chief was in a frigate." This mistake arose from one of their frigates making many signals. Lord *Nelson* ordered his line to be steered about two points more to the northward than that of his Second in Command, for the purpose of cutting off the retreat of the Enemy's van to the port of Cadiz; which was the reason of the three leading ships of Admiral COLLINGWOOD's line being engaged with the Enemy previously to those of the Commander in Chief's line.

The Enemy began to fire on the Royal Sovereign at thirty minutes past eleven o'clock; in ten minutes after which she got under the stern of the St. Anna, and commenced a fire on her. Lieutenant *Pasco*, Signal Officer of the Victory, was heard to say while looking through his glass, "There is a top-gallant-yard gone." His *Lordship* eagerly asked, "Whose top-gallant-yard is that gone? Is it the Royal Sovereign's?" and on being answered by Lieutenant *Pasco* in the negative, and that it was the Enemy's, he smiled, and said: "*Collingwood* is doing well." [10]

At fifty minutes past eleven the Enemy opened their fire on the Commander in Chief. They shewed great coolness in the commencement of the battle; for as the Victory approached their line, their ships lying immediately ahead of her and across her bows fired only one gun at a time, to ascertain whether she was yet within their range. This was frequently repeated by eight or nine of their ships, till at length a shot passed through the Victory's main-top-gallant-sail; the hole in which being discovered by the Enemy, they immediately opened their broadsides, supporting an awful and tremendous fire. In a very short time afterwards, Mr. *Scott*, Public Secretary to the Commander in Chief, was killed by a cannon-shot while in conversation with Captain *Hardy*. Lord *Nelson* being then near them, Captain *Adair* of the Marines, with the assistance of a Seaman, endeavoured to remove the body from His LORDSHIP'S sight: but he had already observed the fall of his Secretary; and now said with anxiety, "Is that poor *Scott* that is gone?" and on being answered in the affirmative by Captain *Adair*, he replied, "Poor fellow!"

Lord *Nelson* and Captain *Hardy* walked the quarter-deck in conversation for some time after this, while the Enemy kept up an incessant raking fire. A double-headed shot struck one of the parties of Marines drawn up on the poop, and killed

eight of them; when His *Lordship*, perceiving this, ordered Captain *Adair*, to disperse his men round the ship, that they might not suffer so much from being together. In a few minutes afterwards a shot struck the fore-brace-bits on the quarter-deck, and passed between Lord *Nelson* and Captain *Hardy*; a splinter from the bits bruising Captain HARDY'S foot, and tearing the buckle from his shoe. They both instantly stopped; and were observed by the Officers on deck to survey each other with inquiring looks, each supposing the other to be wounded. His *Lordship* then smiled, and said: "This is too warm work, *Hardy*, to last long;" and declared that "through all the battles he had been in, he had never witnessed more cool courage than was displayed by the *Victory's* crew on this occasion."

The *Victory* by this time, having approached close to the *Enemy's* van, had suffered very severely without firing a single gun: she had lost about twenty men killed, and had about thirty wounded. Her mizen-topmast, and all her studding-sails and their booms, on both sides were shot away; the *Enemy's* fire being chiefly directed at her rigging, with a view to disable her before she could close with them.[11] At four minutes past twelve o'clock she opened her fire, from both sides of her decks, upon the *Enemy*; when Captain *Hardy* represented to His *Lordship*, that "it appeared impracticable to pass through the *Enemy's* line without going on board some one of their ships." Lord *Nelson* answered, "I cannot help it: it does not signify which we run on board of; go on board which you please; take your choice."

At twenty minutes past twelve, the tiller-ropes being shot away, Mr. *Atkinson*, the Master, was ordered below to get the helm put to port; which being done, the *Victory* was soon run on board the *Redoubtable* of seventy-four guns. On coming alongside and nearly on board of her, that ship fired her broadside into the *Victory*, and immediately let down her lower-deck ports; which, as has been since learnt, was done to prevent her from being boarded through them by the *Victory's* crew. She never fired a great gun after this single broadside. A few minutes after this, the *Temeraire* fell likewise on board of the *Redoubtable*, on the side opposite to the *Victory*; having also an *Enemy's* ship, said to be *La Fougueux*, on board of *her* on her other side: so that the extraordinary and unprecedented circumstance occurred here, of *four* ships of the line being *on board of each other* in the heat of battle; forming as compact a tier as if they had been moored together, their heads lying all the same way. The *Temeraire*, as was just before mentioned, was between the *Redoubtable* and *La Fougueux*. The *Redoubtable* commenced a heavy fire of musketry from the tops, which was continued for a considerable time with destructive effect to the *Victory's* crew: her great guns however being silent, it was supposed at different times that she had surrendered; and in consequence of this opinion, the *Victory* twice ceased firing upon her, by orders transmitted from the quarter-deck.

At this period, scarcely a person in the *Victory* escaped unhurt who was exposed to the *Enemy's* musketry; but there were frequent huzzas and cheers heard from between the decks, in token of the surrender of different of the *Enemy's* ships. An incessant fire was kept up from both sides of the *Victory*; her larboard guns played upon the *Santissima Trinidad* and the *Bucentaur*; and the starboard guns of the middle and lower decks were depressed, and fired with a diminished charge of powder, and three shot each, into the *Redoubtable*. This mode of firing was adopted by Lieutenants *Williams*, *King*, *Yule*, and *Brown*, to obviate the danger of the *Temeraire's* suffering from the *Victory's* shot passing through the *Redoubtable*; which must have been the case if the usual quantity of powder, and the common elevation, had been given to the guns.--A circumstance occurred in this situation, which shewed in a most striking manner the cool intrepidity of the Officers and men stationed on the lower deck of the *Victory*. When the guns, on this deck were run out, their muzzles came into contact with the *Redoubtable's* side; and consequently at every discharge there was reason to fear that the *Enemy* would take fire, and both the *Victory* and the *Temeraire* be involved in her flames. Here then was seen the astonishing spectacle of the fireman of each gun standing ready with a bucket full of water which as soon as his gun was discharged he dashed into the *Enemy* through the holes made in her side by the shot.

It was from this ship (the *Redoubtable*) that Lord *Nelson* received his mortal wound. About fifteen minutes past one o'clock, which was in the heat of the engagement, he was walking the middle of the quarter-deck with Captain *Hardy*, and in the act of turning near the hatchway with his face towards the stern of the *Victory*, when the fatal ball was fired from the *Enemy's* mizen-top; which, from the situation of the two ships (lying on board of each other), was brought just

abaft, and rather below, the Victory's main-yard, and of course not more than fifteen yards distant from that part of the deck where His *Lordship* stood. The ball struck the epaulette on his left shoulder, and penetrated his chest. He fell with his face on the deck. Captain *Hardy*, who was on his right (the side furthest from the Enemy) and advanced some steps before His *Lordship*, on turning round, saw the Serjeant Major (*Secker*) of Marines with two Seamen raising him from the deck; where he had fallen on the same spot on which, a little before, his Secretary had breathed his last, with whose blood His LORDSHIP's clothes were much soiled. Captain *Hardy* expressed a hope that he was not severely wounded; to which the gallant Chief replied: "They have done for me at last, *Hardy*."---"I hope not," answered Captain *Hardy*. "Yes," replied His *Lordship*; "my backbone is shot through."

*Captain Hardy* ordered the Seamen to carry the Admiral to the cockpit; and now two incidents occurred strikingly characteristic of this great man, and strongly marking that energy and reflection which in his heroic mind rose superior even to the immediate consideration of his present awful condition. While the men were carrying him down the ladder from the middle deck, His *Lordship* observed that the tiller-ropes were not yet replaced; and desired one of the Midshipmen stationed there to go upon the quarter-deck and remind Captain *Hardy* of that circumstance, and request that new ones should be immediately rove. Having delivered this order, he took his handkerchief from his pocket and covered his face with it, that he might be conveyed to the cockpit at this crisis unnoticed by the crew.

Several wounded Officers, and about forty men, were likewise earned to the Surgeon for assistance just at this time; and some others had breathed their last during their conveyance below. Among the latter were Lieutenant *William Andrew Ram*, and Mr. *Whipple* Captain's Clerk. The Surgeon had just examined these two Officers, and found that they were dead,[12] when his attention was arrested by several of the wounded calling to him, "Mr. *Beatty*, Lord *Nelson* is here: Mr. *Beatty*, the Admiral is wounded."---The Surgeon now, on looking round, saw the handkerchief fall from His LORDSHIP's face; when the stars on his coat, which also had been covered by it, appeared. Mr. *Burke* the Purser, and the Surgeon, ran immediately to the assistance of His *Lordship*, and took him from the arms of the Seamen who had carried him below. In conveying him to one of the Midshipmen's births, they stumbled, but recovered themselves without falling. Lord *Nelson* then inquired who were supporting him; and when the Surgeon informed him, His *Lordship* replied, "Ah, Mr. *Beatty*! you can do nothing for me. I have but a short time to live: my back is shot through." The Surgeon said, "he hoped the wound was not so dangerous as His *Lordship* imagined, and that he might still survive long to enjoy his glorious victory." The Reverend Doctor *Scott*, who had been absent in another part of the cockpit administering lemonade to the wounded, now came instantly to His *Lordship*; and in the anguish of grief wrung his hands, and said: "Alas, *Beatty*, how prophetic you were!" alluding to the apprehensions expressed by the Surgeon for His LORDSHIP's safety previous to the battle.

His *Lordship* was laid upon a bed, stripped of his clothes, and covered with a sheet. While this was effecting, he said to Doctor *Scott*, "Doctor, I told you so. Doctor, I am gone;" and after a short pause he added in a low voice, "I have to leave Lady *Hamilton*, and my adopted daughter HORATIA, as a legacy to my Country." The Surgeon then examined the wound, assuring His *Lordship* that he would not put him to much pain in endeavouring to discover the course of the ball; which he soon found had penetrated deep into the chest, and had probably lodged in the spine. This being explained to His *Lordship*, he replied, "he was confident his back was shot through." The back was then examined externally, but without any injury being perceived; on which His *Lordship* was requested by the Surgeon to make him acquainted with all his sensations. He replied, that "he felt a gush of blood every minute within his breast: that he had no feeling in the lower part of his body: and that his breathing was difficult, and attended with very severe pain about that part of the spine where he was confident that the ball had struck; for," said he, "I felt it break my back." These symptoms, but more particularly the gush of blood which His *Lordship* complained of, together with the state of his pulse, indicated to the Surgeon the hopeless situation of the case; but till after the victory was ascertained and announced to His *Lordship*, the true nature of his wound was concealed by the Surgeon from all on board except only Captain *Hardy*, Doctor *Scott*, Mr. *Burke*, and Messrs. *Smith* and WESTENBURG the Assistant Surgeons.

The Victory's crew cheered whenever they observed an Enemy's ship surrender. On one of these occasions, Lord *Nelson* anxiously inquired what was the cause of it; when Lieutenant *Pasco*, who lay wounded at some distance from His *Lordship*, raised himself up, and told him that another ship had struck, which appeared to give him much satisfaction. He now felt an ardent thirst; and frequently called for drink, and to be fanned with paper, making use of these words: "Fan, fan," and "Drink, drink." This he continued to repeat, when he wished for drink or the refreshment of cool air, till a very few minutes before he expired. Lemonade, and wine and water, were given to him occasionally. He evinced great solicitude for the event of the battle, and fears for the safety of his friend Captain *Hardy*. Doctor *Scott* and Mr. *Burke* used every argument they could suggest, to relieve his anxiety. Mr. *Burke* told him "the Enemy were decisively defeated, and that he hoped His *Lordship* would still live to be himself the bearer of the joyful tidings to his country." He replied, "It is nonsense, Mr. *Burke*, to suppose I can live: my sufferings are great, but they will all be soon over." Doctor *Scott* entreated His *Lordship* "not to despair of living," and said "he trusted that Divine Providence would restore him once more to his dear Country and friends."---"Ah, Doctor!" replied His *Lordship*, "it is all over; it is all over."

Many messages were sent to Captain *Hardy* by the Surgeon, requesting his attendance on His *Lordship*; who became impatient to see him, and often exclaimed: "Will no one bring *Hardy* to me? He must be killed: he is surely destroyed," The Captain's Aide-de-camp, Mr. *Bulkley*, now came below, and stated that "circumstances respecting the Fleet required Captain HARDY'S presence on deck, but that he would avail himself of the first favourable moment to visit His *Lordship*." On hearing him deliver this message to the Surgeon, His *Lordship* inquired who had brought it. Mr. *Burke* answered, "It is Mr. *Bulkley*, my Lord."---"It is his voice," replied His *Lordship*: he then said to the young gentleman, "Remember me to your father."

An hour and ten minutes however elapsed, from the time of His LORDSHIP's being wounded, before Captain HARDY's first subsequent interview with him; the particulars of which are nearly as follow. They shook hands affectionately, and Lord *Nelson* said: "Well, *Hardy*, how goes the battle? How goes the day with us?"---"Very well, my Lord," replied Captain *Hardy*: "we have got twelve or fourteen of the Enemy's ships in our possession; but five of their van have tacked, and shew an intention of bearing down upon the Victory. I have therefore called two or three of our fresh ships round us, and have no doubt of giving them a drubbing." "I hope," said *his Lordship*, "none of *our* ships have struck, *Hardy*."---"No, my Lord," replied Captain *Hardy*; "there is no fear of that." Lord *Nelson* then said: "I am a dead man, *Hardy*. I am going fast: it will be all over with me soon. Come nearer to me. Pray let my dear Lady *Hamilton* have my hair, and all other things belonging to me." Mr. *Burke* was about to withdraw at the commencement of this conversation; but *his Lordship*, perceiving his intention, desired he would remain. Captain *Hardy* observed, that "he hoped Mr. *Beatty* could yet hold out some prospect of life."---"Oh! no," answered *his Lordship*; "it is impossible. My back is shot through. *Beatty* will tell you so." Captain *Hardy* then returned on deck, and at parting shook hands again with his revered friend and commander.

*His Lordship* now requested the Surgeon, who had been previously absent a short time attending Mr. *Rivers*, to return to the wounded, and give his assistance to such of them as he could be useful to; "for," said he, "you can do nothing for me." The Surgeon assured him that the Assistant Surgeons were doing every thing that could be effected for those unfortunate men; but on *his LORDSHIP's* several times repeating his injunctions to that purpose, he left him surrounded by Doctor *Scott*, Mr. *Burke*, and two of *his LORDSHIP'S* domestics. After the Surgeon had been absent a few minutes attending Lieutenants *Peake* and *Reeves* of the Marines, who were wounded, he was called by Doctor *Scott* to *his Lordship*, who said: "Ah, Mr. *Beatty*! I have sent for you to say, what I forgot to tell you before, that all power of motion and feeling below my breast are gone; and *you*" continued he, "very well *know* I can live but a short time." The emphatic manner in which he pronounced these last words, left no doubt in the Surgeon's mind, that he adverted to the case of a man who had some months before received a mortal injury of the spine on board the Victory, and had laboured under similar privations of sense and muscular motion. The case had made a great impression on Lord *Nelson*: he was anxious to know the cause of such symptoms, which was accordingly explained to him; and he now appeared to apply the situation and fate of this man to himself.[13] The Surgeon answered, "My Lord, you told me so before:" but he now

examined the extremities, to ascertain the fact; when *his Lordship* said, "Ah, *Beatty!* I am too certain of it: *Scott* and *Burke* have tried it already. *You know* I am gone." The Surgeon replied: "My Lord, unhappily for our Country, nothing can be done for you;" and having made this declaration he was so much affected, that he turned round and withdrew a few steps to conceal his emotions. *His Lordship* said: "I know it. I feel something rising in my breast," putting his hand on his left side, "which tells me I am gone." Drink was recommended liberally, and Doctor *Scott* and Mr. *Burke* fanned him with paper. He often exclaimed, "*God* be praised, I have done my duty;" and upon the Surgeon's inquiring whether his pain was still very great, he declared, "it continued so very severe, that he wished he was dead. Yet," said he in a lower voice, "one would like to live a little longer, too:" and after a pause of a few minutes, he added in the same tone, "What would become of poor Lady *Hamilton*, if she knew my situation!"

The Surgeon, finding it impossible to render *his Lordship* any further assistance, left him, to attend Lieutenant *Bligh*, Messrs. *Smith* and WESTPHALL Midshipmen, and some Seamen, recently wounded. Captain *Hardy* now came to the cockpit to see *his Lordship* a second time, which was after an interval of about fifty minutes from the conclusion of his first visit. Before he quitted the deck, he sent Lieutenant *Hills* to acquaint Admiral *Collingwood* with the lamentable circumstance of Lord NELSON'S being wounded.[14]---Lord *Nelson* and Captain *Hardy* shook hands again: and while the Captain retained *his* LORDSHIP'S hand, he congratulated him even in the arms of Death on his brilliant victory; "which," he said, "was complete; though he did not know how many of the Enemy were captured, as it was impossible to perceive every ship distinctly. He was certain however of fourteen or fifteen having surrendered." *His Lordship* answered, "That is well, but I bargained for twenty:" and then emphatically exclaimed, "*Anchor, HARDY, anchor!*" To this the Captain replied: "I suppose, my Lord, Admiral COLLINGWOOD will now take upon himself the direction of affairs."---"Not while I live, I hope, HARDY!" cried the dying Chief; and at that moment endeavoured ineffectually to raise himself from the bed. "No," added he; "do *you* anchor, HARDY." Captain HARDY then said: "Shall *we* make the signal, Sir?"---"Yes," answered HIS LORDSHIP; "for if I live, I'll anchor." [15] The energetic manner in which he uttered these his last orders to Captain HARDY, accompanied with his efforts to raise himself, evinced his determination never to resign the command while he retained the exercise of his transcendant faculties, and that he expected Captain HARDY still to carry into effect the suggestions of his exalted mind; a sense of his duty overcoming the pains of death. He then told Captain HARDY, "he felt that in a few minutes he should be no more;" adding in a low tone, "Don't throw me overboard, HARDY." The Captain answered: "Oh! no, certainly not."---"Then," replied HIS LORDSHIP, "you know what to do:[16] and," continued he, "take care of my dear Lady HAMILTON, HARDY; take care of poor Lady HAMILTON. Kiss me, HARDY." The Captain now knelt down, and kissed his cheek; when HIS LORDSHIP said, "Now I am satisfied. Thank GOD, I have done my duty." Captain HARDY stood for a minute or two in silent contemplation: he then knelt down again, and kissed HIS LORDSHIP'S forehead. HIS LORDSHIP said: "Who is that?" The Captain answered: "It is HARDY;" to which HIS LORDSHIP replied, "GOD bless you, HARDY!" After this affecting scene Captain HARDY withdrew, and returned to the quarter-deck, having spent about eight minutes in this his last interview with his dying friend.

Lord NELSON now desired Mr. CHEVALIER, his Steward, to turn him upon his right side; which being effected, HIS LORDSHIP said: "I wish I had not left the deck, for I shall soon be gone." He afterwards became very low; his breathing was oppressed, and his voice faint. He said to Doctor SCOTT, "Doctor, I have *not* been a *great* sinner;" and after a short pause, "*Remember*, that I leave Lady HAMILTON and my Daughter HORATIA as a legacy to my Country: and," added he, "never forget HORATIA." His thirst now increased; and he called for "Drink, drink," "Fan, fan," and "Rub, rub:" addressing himself in the last case to Doctor SCOTT, who had been rubbing HIS LORDSHIP'S breast with his hand, from which he found some relief. These words he spoke in a very rapid manner, which rendered his articulation difficult: but he every now and then, with evident increase of pain, made a greater effort with his vocal powers, and pronounced distinctly these last words: "Thank GOD, I have done my duty;" and this great sentiment he continued to repeat as long as he was able to give it utterance.

HIS LORDSHIP became speechless in about fifteen minutes after Captain HARDY left him. Doctor SCOTT and Mr. BURKE, who had all along sustained the bed under his shoulders (which raised him in nearly a semi-recumbent posture, the only one that was supportable to him), forbore to disturb him by speaking to him; and when he had remained speechless about five minutes, HIS LORDSHIP'S Steward went to the Surgeon, who had been a short time occupied with the wounded in another part of the cockpit, and stated his apprehensions that HIS LORDSHIP was dying. The Surgeon immediately repaired to him, and found him on the verge of dissolution. He knelt down by his side, and took up his hand; which was cold, and the pulse gone from the wrist. On the Surgeon's feeling his forehead, which was likewise cold, HIS LORDSHIP opened his eyes, looked up, and shut them again. The Surgeon again left him, and returned to the wounded who required his assistance; but was not absent five minutes before the Steward announced to him that "he believed HIS LORDSHIP had expired." The Surgeon returned, and found that the report was but too well founded: HIS LORDSHIP had breathed his last, at thirty minutes past four o'clock; at which period Doctor SCOTT was in the act of rubbing HIS LORDSHIP'S breast, and Mr. BURKE supporting the bed under his shoulders,[17]

Thus died this matchless Hero, after performing, in a short but brilliant and well-filled life, a series of naval exploits unexampled in any age of the world. None of the sons of Fame ever possessed greater zeal to promote the honour and interest of his King and Country; none ever served them with more devotedness and glory, or with more successful and important results. His character will for ever cast a lustre over the annals of this nation, to whose enemies his very name was a terror. In the battle off CAPE ST. VINCENT, though then in the subordinate station of a Captain, his unprecedented personal prowess will long be recorded with admiration among his profession. The shores of ABOUKIR and COPENHAGEN subsequently witnessed those stupendous achievements which struck the whole civilized world with astonishment. Still these were only preludes to the BATTLE OF TRAFALGAR: in which he shone with a majesty of dignity as far surpassing even his own former renown, as that renown had already exceeded every thing else to be found in the pages of naval history; the transcendentally brightest star in a galaxy of heroes. His splendid example will operate as an everlasting impulse to the enterprising genius of the British Navy.[18]

From the time of HIS LORDSHIP'S being wounded till his death, a period of about two hours and forty-five minutes elapsed; but a knowledge of the decisive victory which was gained, he acquired of Captain HARDY within the first hour-and-a-quarter of this period. A partial cannonade, however, was still maintained, in consequence of the Enemy's running ships passing the British at different points; and the last distant guns which were fired at their van ships that were making off, were heard a minute or two before His LORDSHIP expired.

A steady and continued fire was kept up by the Victory's starboard guns on the Redoubtable, for about fifteen minutes after Lord NELSON was wounded; in which short period Captain ADAIR and about eighteen Seamen and Marines were killed, and Lieutenant BLIGH, Mr. PALMER Midshipman, and twenty Seamen and Marines, wounded, by the Enemy's musketry alone. The Redoubtable had been on fire twice, in her fore-chains and on her fore-castle: she had likewise succeeded in throwing a few hand-grenades into the Victory, which set fire to some ropes and canvas on the booms. The cry of "Fire!" was now circulated throughout the ship, and even reached the cockpit, without producing the degree of sensation which might be expected on such an awful occasion: the crew soon extinguished the fire on the booms, and then immediately turned their attention to that on board the Enemy; which they likewise put out by throwing buckets of water from the gangway into the Enemy's chains and fore-castle, thus furnishing another admirable instance of deliberate intrepidity. At thirty minutes past one o'clock, the Redoubtable's musketry having ceased, and her colours being struck, the Victory's men endeavoured to get on board her: but this was found impracticable; for though the two ships were still in contact, yet the top-sides or upper-works of both fell in so much on their upper decks, that there was a great space (perhaps fourteen feet or more) between their gangways; and the Enemy's ports being down, she could not be boarded from the Victory's lower nor middle deck. Several Seamen volunteered their services to Lieutenant QUILLIAM, to jump overboard, swim under the Redoubtable's bows, and endeavour to get up there; but Captain HARDY refused to permit this. The prize however, and the Victory, fell off from each other; and their separation was believed to be the effect of the concussion produced by the Victory's fire, assisted by the helm of the latter being put to starboard.

MESSRS. OGILVIE and COLLINGWOOD, Midshipmen of the Victory, were sent in a small boat to take charge of the prize, which they effected.[19] After this, the ships of the Enemy's van that had shewn a disposition to attack the Victory, passed to windward; and fired their broadsides not only into her and the Temeraire, but also into the French and Spanish captured ships indiscriminately: and they were seen to back or shiver their topsails for the purpose of doing this with more precision.[20] The two Midshipmen of the Victory had just boarded the Redoubtable, and got their men out of the boat, when a shot from the Enemy's van ships that were making off cut the boat adrift. About ten minutes after taking possession of her, a Midshipman came to her from the Temeraire; and had hardly ascended the poop, when a shot from one of those ships took off his leg. The French Officers, seeing the firing continued on the prize by their own countrymen, entreated the English Midshipmen to quit the deck, and accompany them below. The unfortunate Midshipman of the Temeraire was carried to the French Surgeon, who was ordered to give his immediate attendance to him in preference to his own wounded: his leg was amputated, but he died the same night. The Redoubtable suffered so much from shot received between wind and water, that she sunk while in tow of the Swiftsure on the following evening, when the gale came on; and out of a crew originally consisting of more than eight hundred men, only about a hundred and thirty were saved: but she had lost above three hundred in the battle.[21]

It is by no means certain, though highly probable, that Lord NELSON was particularly aimed at by the Enemy. There were only two Frenchmen left alive in the mizen-top of the Redoubtable at the time of His LORDSHIP'S being wounded, and by the hands of one of these he fell. These men continued firing at Captains HARDY and ADAIR, Lieutenant ROTELY of the Marines, and some of the Midshipman on the Victory's poop, for some time afterwards. At length one of them was killed by a musket-ball: and on the other's then attempting to make his escape from the top down the rigging, Mr. POLLARD (Midshipman) fired his musket at him, and shot him in the back; when he fell dead from the shrouds, on the Redoubtable's poop.

The Writer of this will not attempt to depict the heart-rending sorrow, and melancholy gloom, which pervaded the breast and the countenance of every individual on board the Victory when His LORDSHIP'S death became generally known. The anguish felt by all for such a loss, rendered doubly heavy to *them*, is more easy to be conceived than described: by his lamented fall they were at once deprived of their adored commander, and their friend and patron.

The battle was fought in soundings about sixteen miles to the westward of Cape Trafalgar; and if fortunately there had been more wind in the beginning of the action, it is very probable that Lord NELSON would still have been saved to his Country, and that every ship of the line composing the Combined Fleets would have been either captured or destroyed: for had the Victory been going fast through the water, she must have dismasted the Redoubtable, and would of course have passed on to attack another ship; consequently His LORDSHIP would not have been so long nor so much exposed to the Enemy's musketry. From the same circumstance of there being but little wind, several of the Enemy's ships made off before the rear and bad-sailing ships of the British lines could come up to secure them.

THE Victory had no musketry in her tops: as His LORDSHIP had a strong aversion to small arms being placed there, from the danger of their setting fire to the sails; which was exemplified by the destruction of the French ship L'Achille in this battle. It is a species of warfare by which individuals may suffer, and now and then a Commander be picked off: but it never can decide the fate of a general engagement; and a circumstance in many respects similar to that of the Victory's running on board of the Redoubtable, may not occur again in the course of centuries. The loss sustained by the Victory amounted to fifty-five killed, and a hundred and two wounded;[22] and it is highly honourable to the discipline and established regulations of the ship, that not one casualty from accident occurred on board during the engagement.

On the day after the battle, as soon as circumstances permitted the Surgeon to devote a portion of his attention to the care of Lord NELSON'S honoured Remains, measures were adopted to preserve them as effectually as the means then on board the Victory allowed. On the Surgeon's examining the nature of the wound, and the course of the ball, a quantity of blood was evacuated from the left side of the breast: none had escaped before. The ball was traced by a probe to the

spine, but its lodgment could not at that time be discovered. There was no lead on board to make a coffin: a cask called a leaguer, which is of the largest size on shipboard, was therefore chosen for the reception of the Body; which, after the hair had been cut off, was stripped of the clothes except the shirt, and put into it, and the Cask was then filled with brandy.[23]

In the evening after this melancholy task was accomplished, the gale came on with violence from the south-west, and continued that night and the succeeding day without any abatement. During this boisterous weather, Lord NELSON'S Body remained under the charge of a sentinel on the middle deck. The cask was placed on its end, having a closed aperture at its top and another below; the object of which was, that as a frequent renewal of the spirit was thought necessary, the old could thus be drawn off below and a fresh quantity introduced above, without moving the cask, or occasioning the least agitation of the Body. On the 24th there was a disengagement of air from the Body to such a degree, that the sentinel became alarmed on seeing the head of the cask raised: he therefore applied to the Officers, who were under the necessity of having the cask spiled to give the air a discharge. After this, no considerable collection of air took place. The spirit was drawn off once, and the cask filled again, before the arrival of the Victory at Gibraltar (on the 28th of October): where spirit of wine was procured; and the cask, shewing a deficit produced by the Body's absorbing a considerable quantity of the brandy, was then filled up with it.

On the 29th the Victory's Seamen and Marines dangerously wounded in the action, were sent on shore to the naval hospital at Gibraltar. The interval between this day and the 2nd of November was employed in repairing the damage sustained by the ship, erecting jury-masts, fitting her rigging, and completing her in every respect for the voyage to England. On the 2nd of November, preparations were made on board to receive the wounded from the hospital, who had unanimously entreated Captain HARDY not to leave them behind: but their embarkation could not be effected this day; and the Victory being ordered to quit the anchorage in Gibraltar Bay, to make room for the disabled ships and prizes daily arriving, she sailed in the evening for Tetuan Bay, for the purpose of taking on board a supply of fresh water, and awaiting there a favourable wind to pass the Straits. During the night however, and before the Victory gained the coast of Barbary, the wind, which had blown for several days from the west, shifted to the eastward, and a fresh breeze sprung up; she therefore changed her course, and stood back again for Gibraltar, where she arrived early in the morning. She then lay-to in the bay without anchoring, and the boats were immediately sent on shore for the wounded; who were all brought off by noon, except five of the worst cases who could not be removed.[24] In the afternoon the Victory and Belleisle sailed from Gibraltar Bay, and passed through the Straits during the night of the 4th. The next day at noon they joined the squadron under the command of Admiral COLLINGWOOD, then cruising off Cadiz; from which they parted company the same evening, and pursued their course together for England.

When the Victory had proceeded some weeks on her voyage, adverse winds and tempestuous weather having prolonged the passage much beyond the period that is generally expected, it was thought proper to draw off the spirit from the cask containing Lord NELSON'S Body, and renew it; and this was done twice. On these occasions brandy was used in the proportion of two-thirds to one of spirit of wine.

At length the Victory arrived at Spithead, after a tedious passage of nearly five weeks from Gibraltar: and as no instructions respecting His LORDSHIP'S Remains were received at Portsmouth while the ship remained there, and orders being transmitted to Captain HARDY for her to proceed to the Nore, the Surgeon represented to him the necessity of examining the state of the Body; common report giving reason to believe that it was intended to lie in state at Greenwich Hospital, and to be literally exposed to the public. On the 11th of December therefore, the day on which the Victory sailed from Spithead for the Nore, Lord NELSON'S Body was taken from the cask in which it had been kept since the day after his death. On inspecting it externally, it exhibited a state of perfect preservation, without being in the smallest degree offensive. There were, however, some appearances that induced the Surgeon to examine the condition of the bowels; which were found to be much decayed, and likely in a short time to communicate the process of putrefaction to the rest of the Body: the parts already injured were therefore removed. It was at this time that the fatal ball was

discovered: it had passed through the spine, and lodged in the muscles of the back, towards the right side, and a little below the shoulder-blade. A very considerable portion of the gold-lace, pad, and lining of the epaulette, with a piece of the coat, was found attached to the ball: the lace of the epaulette was as firmly so, as if it had been inserted into the metal while in a state of fusion.[25]

The following is the professional Report on HIS LORDSHIP'S wound and death, made by the Surgeon on this occasion;

*"His Majesty's Ship Victory, at Sea,  
11th December, 1805.*

"About the middle of the action with the Combined Fleets on the 21st of October last, the late illustrious Commander in Chief Lord NELSON was mortally wounded in the left breast by a musket-ball, supposed to be fired from the mizen-top of La Redoutable French ship of the line, which the Victory fell on board of early in the battle. HIS LORDSHIP was in the act of turning on the quarter-deck with his face towards the Enemy, when he received his wound: he instantly fell; and was carried to the cockpit, where he lived about two hours.[26] On being brought below, he complained of acute pain about the sixth or seventh dorsal vertebra, and of privation of sense and motion of the body and inferior extremities. His respiration was short and difficult; pulse weak, small, and irregular. He frequently declared his back was shot through, that he felt every instant a gush of blood within his breast, and that he had sensations which indicated to him the approach of death. In the course of an hour his pulse became indistinct, and was gradually lost in the arm. His extremities and forehead became soon afterwards cold. He retained his wonted energy of mind, and exercise of his faculties, till the last moment of his existence; and when the victory as signal as decisive was announced to him, he expressed his pious acknowledgments, and heart-felt satisfaction at the glorious event, in the most emphatic language. He then delivered his last orders with his usual precision, and in a few minutes afterwards expired without a struggle.

*"Course and site of the Ball, as ascertained since death.*

"The ball struck the fore part of HIS LORDSHIP'S epaulette; and entered the left shoulder immediately before the processus acromion scapulae, which it slightly fractured. It then descended obliquely into the thorax, fracturing the second and third ribs: and after penetrating the left lobe of the lungs, and dividing in its passage a large branch of the pulmonary artery, it entered the left side of the spine between the sixth and seventh dorsal vertebrae, fractured the left transverse process of the sixth dorsal vertebra, wounded the medulla spinalis, and fracturing the right transverse process of the seventh vertebra, made its way from the right side of the spine, directing its course through the muscles of the back; and lodged therein, about two inches below the inferior angle of the right scapula. On removing the ball, a portion of the gold-lace and pad of the epaulette, together with a small piece of HIS LORDSHIP'S coat, was found firmly attached to it.[27]

"W. BEATTY."

The Remains were wrapped in cotton vestments, and rolled from head to foot with bandages of the same material, in the ancient mode of embalming. The Body was then put into a leaden coffin, filled with brandy holding in solution camphor and myrrh.[28] This coffin was inclosed in a wooden one, and placed in the after-part of HIS LORDSHIP'S cabin; where it remained till the 21st of December, when an order was received from the Admiralty for the removal of the Body. The coffin that had been made from the mainmast of the French Commander's ship L'Orient, and presented to HIS LORDSHIP by his friend Captain HOLLOWELL, after the battle of the Nile, being then received on board, the leaden coffin was opened, and the Body taken out; when it was found still in most excellent condition, and completely plastic. The features were somewhat tumid, from absorption of the spirit; but on using friction with a napkin, they resumed in a great degree their natural character. All the Officers of the ship, and several of HIS LORDSHIP'S friends, as well as some of Captain HARDY'S, who had come on board the Victory that day from the shore, were present at the time of the

Body's being removed from the leaden coffin; and witnessed its undecayed state after a lapse of two months since death, which excited the surprise of all who beheld it. This was the last time the mortal part of the lamented Hero was seen by human eyes; as the Body, after being dressed in a shirt, stockings, uniform small-clothes and waistcoat, neckcloth, and night-cap, was then placed in the shell made from L'Orient's mast, and covered with the shrouding. This was inclosed in a leaden coffin; which was soldered up immediately, and put into another wooden shell: in which manner it was sent out of the Victory into Commissioner GREY'S yacht, which was hauled alongside for that purpose. In this vessel the revered Remains were conveyed to Greenwich Hospital; attended by the Reverend Doctor SCOTT, and Messrs. TYSON and WHITBY.

LORD NELSON had often talked with Captain HARDY on the subject of his being killed in battle, which appeared indeed to be a favourite topic of conversation with him. He was always prepared to lay down his life in the service of his Country; and whenever it should please Providence to remove him from this world, it was the most ambitious wish of his soul to die in the fight, and in the very hour of a great and signal victory. In this he was gratified: his end was glorious; and he died as he had lived, one of the greatest among men.

The following Prayer, found in HIS LORDSHIP'S memorandum-book,---and written with his own hand on the night of his leaving Merton, at one of the places where he changed horses (supposed to be Guildford) on his way to join the Victory at Portsmouth,---is highly illustrative of those sentiments of combined piety and patriotic heroism with which he was inspired:

*"Friday Night, 13th September.*

"Friday night, at half past ten, drove from dear, dear Merton, where I left all which I hold dear in this world, to go to serve my King and Country. May the great GOD whom I adore, enable me to fulfil the expectations of my Country! and if it is His good pleasure that I should return, my thanks will never cease being offered up to the throne of His mercy. But if it is His good providence to cut short my days upon earth, I bow with the greatest submission; relying that He will protect those, so dear to me, that I may leave behind. His will be done!

"AMEN, amen, amen."

HIS LORDSHIP had on several occasions told Captain HARDY, that if he should fall in battle in a foreign climate, he wished his body to be conveyed to England; and that if his Country should think proper to inter him at the public expence, he wished to be buried in Saint Paul's, as well as that his monument should be erected there. He explained his reasons for preferring Saint Paul's to Westminster Abbey, which were rather curious: he said that he remembered hearing it stated as an old tradition when he was a boy, that Westminster Abbey was built on a spot where once existed a deep morass; and he thought it likely that the lapse of time would reduce the ground on which it now stands to its primitive state of a swamp, without leaving a trace of the Abbey. He added, that his actual observations confirmed the probability of this event. He also repeated to Captain HARDY several times during the last two years of his life: "Should I be killed, HARDY, and my Country not bury me, you know what to do with me;" meaning that his body was in that case to be laid by the side of his Father's, in his native village of Burnham Thorpe in Norfolk: and this, as has been before mentioned (in page 48), he adverted to in his last moments.

An opinion has been very generally entertained, that Lord NELSON'S state of health, and supposed infirmities arising from his former wounds and hard services, precluded the probability of his long surviving the battle of Trafalgar, had he fortunately escaped the Enemy's shot: but the Writer of this can assert that HIS LORDSHIP'S health was uniformly good, with the exception of some slight attacks of indisposition arising from accidental causes; and which never continued above two or three days, nor confined him in any degree with respect to either exercise or regimen:[29] and during the last twelve months of his life, he Complained only three times in this way. It is true, that HIS LORDSHIP,

about the meridian of life, had been subject to frequent fits of the gout: which disease however, as well as his constitutional tendency to it, he totally overcame by abstaining for the space of nearly two years from animal food, and wine and all other fermented drink; confining his diet to vegetables, and commonly milk and water. And it is also a fact, that early in life, when he first went to sea, he left off the use of salt, which he then believed to be the sole cause of scurvy, and never took it afterwards with his food.

HIS LORDSHIP used a great deal of exercise, generally walking on deck six or seven hours in the day. He always rose early, for the most part shortly after day-break. He breakfasted in summer about six, and at seven in winter: and if not occupied in reading or writing dispatches, or examining into the details of the Fleet, he walked on the quarter-deck the greater part of the forenoon; going down to his cabin occasionally to commit to paper such incidents or reflections as occurred to him during that time, and as might be hereafter useful to the service of his country. He dined generally about half past two o'clock. At his table there were seldom less than eight or nine persons, consisting of the different Officers of the ship: and when the weather and the service permitted, he very often had several of the Admirals and Captains in the Fleet to dine with him; who were mostly invited by signal, the rotation of seniority being commonly observed by HIS LORDSHIP in these invitations. At dinner he was alike affable and attentive to every one: he ate very sparingly himself; the liver and wing of a fowl, and a small plate of macaroni, in general composing his meal, during which he occasionally took a glass of Champagne. He never exceeded four glasses of wine after dinner, and seldom drank three; and even these were diluted with either Bristol or common water.

Few men subject to the vicissitudes of a naval life, equalled HIS LORDSHIP in an habitual systematic mode of living. He possessed such a wonderful activity of mind, as even prevented him from taking ordinary repose, seldom enjoying two hours of uninterrupted sleep; and on several occasions he did not quit the deck during the whole night. At these times he took no pains to protect himself from the effects of wet, or the night-air; wearing only a thin great coat: and he has frequently, after having his clothes wet through with rain, refused to have them changed, saying that the leather waistcoat which he wore over his flannel one would secure him from complaint. He seldom wore boots, and was consequently very liable to have his feet wet. When this occurred he has often been known to go down to his cabin, throw off his shoes, and walk on the carpet in his stockings for the purpose of drying the feet of them. He chose rather to adopt this uncomfortable expedient, than to give his servants the trouble of assisting him to put on fresh stockings; which, from his having only one hand, he could not himself conveniently effect.

From these circumstances it may be inferred, that though Lord NELSON'S constitution was not of that kind which is generally denominated strong, yet it was not very susceptible of complaint from the common occasional causes of disease necessarily attending a naval life. The only bodily pain which HIS LORDSHIP felt in consequence of his many wounds, was a slight rheumatic affection of the stump of his amputated arm on any sudden variation in the state of the weather; which is generally experienced by those who have the misfortune to lose a limb after the middle age. HIS LORDSHIP usually predicted an alteration in the weather with as much certainty from feeling transient pains in this stump, as he could by his marine barometer; from the indications of which latter he kept a diary of the atmospheric changes, which was written with his own hand.

HIS LORDSHIP had lost his right eye by a contusion which he received at the siege of Calvi, in the island of Corsica. The vision of the other was likewise considerably impaired: he always therefore wore a green shade over his forehead, to defend this eye from the effect of strong light; but as he was in the habit of looking much through a glass while on deck, there is little doubt, that had he lived a few years longer, and continued at sea, he would have lost his sight totally.

The Surgeon had, on the occasion of opening HIS LORDSHIP'S Body, an opportunity of acquiring an accurate knowledge of the sound and healthy state of the thoracic and abdominal viscera, none of which appeared to have ever been the seat of inflammation or disease. There were no morbid indications to be seen; other than those unavoidably attending the human body six weeks after death, even under circumstances more favourable to its preservation. The

heart was small, and dense in its substance; its valves, pericardium, and the large vessels, were sound, and firm in their structure. The lungs were sound, and free from adhesions. The liver was very small, in its colour natural, firm in its texture, and every way free from the smallest appearance of disorganization. The stomach, as well as the spleen and other abdominal contents, was alike free from the traces of disease. Indeed all the vital parts were so perfectly healthy in their appearance, and so small, that they resembled more those of a youth, than of a man who had attained his forty-seventh year; which state of the body, associated with habits of life favourable to health, gives every reason to believe that HIS LORDSHIP might have lived to a great age.

The immediate cause of HIS LORDSHIP'S death was a wound of the left pulmonary artery, which poured out its blood into the cavity of the chest. The quantity of blood thus effused did not appear to be very great: but as the hemorrhage was from a vessel so near the heart, and the blood was consequently lost in a very short time, it produced death sooner than would have been effected by a larger quantity of blood lost from an artery in a more remote part of the body. The injury done to the spine must of itself have proved mortal, but HIS LORDSHIP might perhaps have survived this alone for two or three days; though his existence protracted even for that short period would have been miserable to himself, and highly distressing to the feelings of all around him.

W. BEATTY.

#### FOOTNOTES:

[1] By this ship His LORDSHIP received some newspapers from England, one of which contained a paragraph stating that General MACK was about to be appointed to the command of the Austrian armies in Germany. On reading this, His LORDSHIP made the following observation: "I know General MACK too well. He sold the King of Naples; and if he is now entrusted with an important command, he will certainly betray the Austrian monarchy."

[2] CAPTAIN HARDY left England in a bad state of health, with which he had been afflicted during the last twelve months; but was now in a progressive state of amendment. Lord NELSON asked the Surgeon this day, "how long he thought it might be before Captain HARDY'S perfect recovery;" and on the Surgeon's answering that "he hoped not more than a fortnight,"---"Ah!" replied His LORDSHIP, "before a fortnight the Enemy will be at sea, the business will be done, and we shall be looking out for England."

[3] These Instructions will be found at the end of the Narrative.

[4] HIS LORDSHIP did not wear his sword in the Battle of Trafalgar: it had been taken from the place where it hung up in his cabin, and was laid ready on his table; but it is supposed he forgot to call for it. This was the only action in which he ever appeared without a sword.

[5] It has been since recollected that on the 21st of October 1757, His LORDSHIP'S maternal uncle, Captain SUCKLING, in the Dreadnought, in company with two other line of battle ships, attacked and beat off a French squadron of four sail of the line and three frigates, off Cape Francois. The French Commodore was towed into Cape Francois; and the English ships, being too much disabled to follow up their success, bore away to Jamaica to refit.

[6] This phrase has been subjected to misconstruction; to the Writer of these pages, however, both the purport and expression of it seem very clear, thus; "*might have been offered*" (though it *was not*).

[7] The Victory's sick-report for this day numbered only ten convalescents, who all attended their respective quarters during the battle; and the whole Fleet was in a high state of health. Indeed the excellent health enjoyed by the crew of the Victory from December 1804 up to this period, is perhaps unprecedented: and is attributable solely to Captain

HARDY'S attention to their subordination, temperance, warm clothing, and cleanliness; together with the means daily adopted to obviate the effects of moisture, and to accomplish the thorough ventilation of every part of the ship.

The Victory arrived at Spithead from the memorable and arduous chace of the Enemies' Fleets to Egypt and the West Indies, in August 1805: and notwithstanding the operation of the unfavourable circumstances of rapid change of climate, and the privation of refreshments experienced in that chace, as well as frequent increase of numbers (as in the West Indies there were at one time embarked in her above 990 souls), there was not now a single hospital-patient on board, nor did any occur during the several weeks of her stay in England; with which Lord NELSON expressed himself highly pleased when he joined the ship again, on the 14th of September, at St. Helen's. The Victory's casualties from the 29th of December 1804 to the 20th of October following, were only five fatal cases (one of these by accidental injury), and two patients sent to a naval hospital.

[8] It has been reported, but erroneously, that His LORDSHIP was actually requested by his Officers to change his dress, or to cover his stars.

[9] His LORDSHIP just at this time found fault with the Officer commanding on the forecastle, because the lee (or starboard) lower studding-sail had not been set sooner; a circumstance which, though trivial in itself, shews how well Captain HARDY knew His LORDSHIP'S sentiments.

[10] His LORDSHIP in a few minutes after this called Lieutenant PASCO, Mr. OGILVIE, and some other Officers, near him, and desired them to set their watches by the time of that which His LORDSHIP wore.

[11] The Enemy's fire continued to be pointed so high throughout the engagement, that the Victory did not lose a man on her lower deck; and had only two wounded on that deck, and these by musket-balls.

[12] The reader may judge of the Surgeon's feelings at this momentous period, when informed that that excellent young Officer Mr. RAM was one of his dearest friends.

[13] The instance here alluded to occurred in the month of July, in the Victory's return to Europe from the West Indies; and the man survived the injury thirteen days. HIS LORDSHIP, during the whole of that time, manifested much anxiety at the protracted sufferings of an individual whose dissolution was certain, and was expected every hour.

[14] CAPTAIN HARDY deemed it his duty to give this information to Admiral COLLINGWOOD as soon as the fate of the day was decided; but thinking that HIS LORDSHIP might feel some repugnance to this communication, he left directions for Lieutenant HILLS to be detained on deck at his return, till he himself (Captain HARDY) should come up from the cockpit. Lieutenant HILLS was dispatched on this mission from the Victory, at the very time when the Enemy's van ships that had tacked were passing her to windward and firing at her.

[15] Meaning that in case of HIS LORDSHIP'S surviving till all resistance on the part of the Enemy had ceased, Captain HARDY was then to anchor the British Fleet and the prizes, if it should be found practicable.

[16] Alluding to some wishes previously expressed by HIS LORDSHIP to Captain HARDY respecting the place of his interment.

[17] IT must occur to the reader, that from the nature of the scene passing in the cockpit, and the noise of the guns, the whole of His LORDSHIP'S expressions could not be borne in mind, nor even distinctly heard, by the different persons attending him. The most interesting parts are here detailed.

[18] Immediately after HIS LORDSHIP expired, Captain HARDY went on board the Royal Sovereign, to communicate the melancholy event, and the nature of HIS LORDSHIP'S last orders, to Admiral COLLINGWOOD.

[19] The Redoubtable lay alongside and still foul of the Temeraire for some time after this, and till several Seamen were sent from the latter to the assistance of the two Officers and men belonging to the Victory who had before taken possession of the prize.

[20] These were the ships commanded by Admiral DUMANNOIR, and afterwards captured by the squadron under the command of Sir RICHARD STRACHAN. They were nearly half an hour in passing to windward, during the whole of which time they continued firing on the British ships.

[21] About twenty of the Redoubtable's guns were dismantled in the action. Those on that side of her lower deck opposed to the Victory, were all dismantled except five or six.

[22] Many of those who were slightly wounded did not apply for assistance till after the public return of killed and wounded had been transmitted to Admiral COLLINGWOOD, which therefore reports a smaller number than here stated.

[23] Brandy was recommended by the Surgeon in preference to rum, of which spirit also there was plenty on board. This circumstance is here noticed, because a very general but erroneous opinion was found to prevail on the Victory's arrival in England, that rum preserves the dead body from decay much longer and more perfectly than any other spirit, and ought therefore to have been used: but the fact is quite the reverse, for there are several kinds of spirit much better for that purpose than rum; and as their appropriateness in this respect arises from their degree of strength, on which alone their antiseptic quality depends, brandy is superior. Spirit of wine, however, is certainly by far the best, when it can be procured.

[24] Of the Victory's wounded, three died before she reached Gibraltar, one on the day of her arrival there, and another at the naval hospital at that place a few days afterwards: all the rest got well on board except the five left at Gibraltar, and five others not perfectly recovered from their wounds in January following; when the Victory being put out of commission at Chatham, they were sent to the Sussex hospital-ship at Sheerness.

[25] The ball was *not* fired from a rifle piece.

[26] It was not deemed necessary to insert in this Report the precise time which HIS LORDSHIP survived his wound. This, as before stated, was in reality two hours and three quarters.

[27] FIG. 1. in the annexed Plate represents the Ball in the exact state in which it was extracted. Drawn by Mr. W.E. DEVIS, who was then on board the Victory.

FIG. 2. (drawn also by Mr. DEVIS) shews the Ball in its present state; as set in crystal by Mr. YONGE, and presented to the Writer of this Narrative by Sir THOMAS HARDY.

The Ball, in perforating the epaulette, passed through many of the silk cords supporting the bullions, and through the pad and a doubling of silk besides; as the bag of the pad was composed of yellow silk. This circumstance militates strongly against an opinion entertained by some, that silk possesses in an eminent degree the power of resisting the force, or arresting the velocity, of a musket or pistol ball.

[28] The stock of spirit of wine on board was exhausted and from the sound state of the Body, brandy was judged sufficient for its preservation.

[29] These complaints were the consequence of indigestion, brought on by writing for several hours together. HIS LORDSHIP had one of these attacks from that cause a few days before the battle, but on resuming his accustomed exercise he got rid of it. This attack alarmed him, as he attributed it to sudden and violent spasm; but it was merely an unpleasant symptom (*globus hystericus*) attending indigestion.

#### APPENDIX.

#### INSTRUCTIONS

*Issued by LORD NELSON to the Admirals and Captains of his Fleet, several days previous to the Battle.*

Victory, off Cadiz, 10th of October, 1805.

GENERAL MEMORANDUM *sent to the Commanders of Ships.*

Thinking it almost impossible to bring a Fleet of forty sail of the line into a line of battle in variable winds, thick weather, and other circumstances which must occur, without such a loss of time that the opportunity would probably be lost of bringing the Enemy to battle in such a manner as to make the business decisive, I have therefore made up my mind to keep the Fleet in that position of sailing, with the exception of the First and Second in Command, that the order of sailing is to be the order of battle: placing the Fleet in two lines, of sixteen ships each with an advanced squadron of eight of the fastest-sailing two-decked ships; which will always make, if wanted, a line of twenty-four sail, on whichever line the Commander in Chief may direct.

The Second in Command will, after my intentions are made known to him, have the entire direction of his line; to make the attack upon the Enemy, and to follow up the blow until they are captured or destroyed.

If the Enemy's Fleet should be seen to windward in line of battle, and that the two lines and advanced squadron could fetch them, they will probably be so extended that their van could not succour their rear. I should therefore probably make the Second in Command's signal to lead through about their twelfth ship from their rear; or wherever he could fetch, if not able to get so far advanced. My line would lead through about their centre: and the advanced squadron to cut three or four ships ahead of their centre, so as to ensure getting at their Commander in Chief, on whom every effort must be made to capture.

The whole impression of the British Fleet must be, to overpower from two or three ships ahead of their Commander in Chief (supposed to be in the centre) to the rear of their Fleet.

I will suppose twenty sail of the Enemy's line to be untouched: it must be some time before they could perform a manoeuvre to bring their force compact to attack any part of the British Fleet engaged, or to succour their own ships; which indeed would be impossible, without mixing with the ships engaged. The Enemy's Fleet is supposed to consist of forty-six sail of the line; British, forty:[30] if either is less, only a proportional number of Enemy's ships are to be cut off; British to be one-fourth superior to the Enemy cut off.

Something must be left to chance: nothing is sure in a sea-fight, beyond all others; shot will carry away masts and yards of friends as well as foes: but I look with confidence to a victory before the van of the Enemy could succour their rear; and then that the British Fleet would most of them be ready to receive their twenty sail of the line, or to pursue them should they endeavour to make off.

If the van of the Enemy tack, the captured ships must run to leeward of the British Fleet: if the Enemy wear, the British must place themselves between the Enemy and captured, and disabled British ships: and should the Enemy close, I have no fear for the result.

The Second in Command will, in all possible things, direct the movements of his line, by keeping them so compact as the nature of the circumstances will admit. Captains are to look to their particular line as their rallying-point; but in case signals cannot be seen or clearly understood, no Captain can do very wrong if he places his ship alongside that of an Enemy.

Plan of the intended attack from to-windward, the Enemy in line of battle ready to receive an attack:

```
----- Advanced squadron.}
----- Weather line.      } British.
----- Lee line.          }
-----
Enemy's line.
```

The divisions of the British Fleet will be brought nearly within gun-shot of the Enemy's centre. The signal will be made for the lee line to bear up together; to set all their sail, even studding-sails, in order to get as quickly as possible to the Enemy's line; and to cut through, beginning from the twelfth ship from the Enemy's rear. Some ships may not get through their exact place, but they will always be at hand to assist their friends. If any are thrown in the rear of the Enemy, they will effectually complete the business of twelve sail of the Enemy.

Should the Enemy wear together, or bear up and sail large, still the twelve ships composing in the first position the Enemy's rear, are to be the object of attack of the lee line, unless otherwise directed by the Commander in Chief: which is scarcely to be expected; as the entire management of the lee line, after the intentions of the Commander in Chief are signified, is intended to be left to the Admiral commanding that line.

The remainder of the Enemy's Fleet, thirty-four sail, are to be left to the management of the Commander in Chief; who will endeavour to take care that the movements of the Second in Command are as little interrupted as possible.

NELSON AND BRONTE.

By Command of the Vice Admiral.  
JNO. SCOTT.

#### MEMORANDUM BOOK

*The following interesting Extracts are faithfully copied from HIS LORDSHIP'S Memorandum Book, written entirely with his own hand.*

Saturday, September 14th, 1805. At six o'clock arrived at Portsmouth; and having arranged all my business, embarked at the bathing-machines with Mr. ROSE and Mr. CANNING, who dined with me. At two got on board the Victory, at St. Helen's.

Wednesday, Sept. 25th, 1805. Light airs southerly. Saw the rock of Lisbon S.S.E. ten leagues. At sunset the Captain of the Constance came on board, and sent my letters for England to Lisbon, and wrote to Captain SUTTON[31] and the Consul. The Enemy's Fleet had not left Cadiz the 18th of this month, therefore I yet hope they will wait my arrival.

Saturday, Sept. 28th, 1805. Fresh breezes at N.N.W. At day-light bore up, and made sail. At nine saw the AETna cruising. At noon saw eighteen sail. Nearly calm. In the evening joined the Fleet under Vice Admiral COLLINGWOOD. Saw the Enemy's Fleet in Cadiz, amounting to thirty-five or thirty-six sail of the line.

Sunday, Sept. 29th. Fine weather. Gave out the necessary orders for the Fleet. Sent Euryalus to watch the Enemy with the Hydra off Cadiz.

Wednesday, October 9th. Fresh breezes easterly. Received an account from BLACKWOOD, that the French ships had all bent their top-gallant-sails. Sent the Pickle to him, with orders to keep a good look-out. Sent Admiral COLLINGWOOD the Nelson truth.[32] At night wind westerly.

Monday, Oct. 14th. Fine weather: westerly wind. Sent Amphion to Gibraltar and Algiers. Enemy at the harbour's mouth. Placed Defence and Agamemnon from seven to ten leagues west of Cadiz; and Mars and Colossus five leagues east of the Fleet, whose station is from fifteen to twenty west of Cadiz: and by this chain I hope to have a constant communication with the frigates off Cadiz.

Wednesday, Oct. 16th. Moderate breezes westerly. All the forenoon employed forming the Fleet into the order of sailing. At noon fresh breezes W.S.W. and squally. In the evening fresh gales. The Enemy as before, by signal from Weazle.

Thursday, Oct. 17th. Moderate breezes north-westerly. Sent the Donegal to Gibraltar, to get a ground-tier of casks. Received accounts by the Diligent storeship, that Sir RICHARD STRACHAN was supposed in sight of the French Rochefort squadron; which I hope is true.

Friday, Oct. 18th. Fine weather: wind easterly. The Combined Fleets cannot have finer weather to put to sea.

Saturday, Oct. 19th. Fine weather: wind easterly. At half past nine the Mars, being one of the look-out ships, made the signal that the Enemy were coming out of port. Made the signal for a general chase S.E. Wind at south; Cadiz bearing E.S.E. by compass, distance sixteen leagues. At three the Colossus made the signal that the Enemy's Fleet was at sea. In the evening made the signal to observe my motions during the night; for the Britannia, Prince, and Dreadnought, to take stations as most convenient; and for Mars, Orion, Belleisle, Leviathan, Bellerophon, and Polyphemus, to go ahead during the night, and to carry a light, standing for the Straits' mouth.

Sunday, Oct. 20th. Fresh breezes S.S.W., and rainy. Communicated with Phoebe, Defence, and Colossus, who saw near forty sail of ships of war outside of Cadiz yesterday evening; but the wind being southerly, they could not get to the mouth of the Straits. We were between Trafalgar and Cape Spartel. The frigates made the signal that they saw nine sail outside the harbour. Sent the frigates instructions for their guidance; and placed the Defence, Colossus, and Mars, between me and the frigates. At noon fresh gales, and heavy rain: Cadiz N.E. nine leagues. In the afternoon Captain BLACKWOOD telegraphed that the Enemy seemed determined to go to the westward;--and *that* they shall *not* do, if in the power of NELSON AND BRONTE to prevent them. At five telegraphed Captain BLACKWOOD, that I relied upon his keeping sight of the Enemy. At five o'clock Naiad made the signal for thirty-one sail of the Enemy N.N.E. The frigates and look-out ship kept sight of the Enemy most admirably all night, and told me by signal which tack they were upon. At eight we wore, and stood to the S.W.; and at four wore and stood to the N.E.

Monday, Oct. 21st. At day-light saw Enemy's Combined Fleets from east to E.S.E. Bore away. Made the signal for order of sailing, and to prepare for battle. The Enemy with their heads to the southward. At seven the Enemy wearing in succession.

\* \* \* \* \*

*Then follow the Prayer and Codicil already inserted in pages 14 and 15 of the Narrative, which conclude HIS LORDSHIP'S manuscript.*

FOOTNOTES:

[30] With such an inferiority of force as this, HIS LORDSHIP confidently expected not only to gain a decisive victory, but (to use his own favourite phrase) "completely to *annihilate the Enemy's Fleet!*"

[31] Of his Majesty's ship Amphion, then in the Tagus.

[32] It is presumed that HIS LORDSHIP here meant the preceding Instructions, which were transmitted the next day to the whole Fleet.
