Whether we may not easily prevent the ill effects of such a bank as Mr Law proposed for Scotland, which was faulty in not limiting the quantum of bills, and permitting all persons to take out what bills they pleased, upon the mortgage of lands, whence by a glut of paper, the prices of things must rise? Whence also the fortunes of men must increase in denomination, though not in value; whence pride, idleness, and beggary?

226. Qu. Whether the bank proposed to be established in Ireland, under the notion of a national bank, by the voluntary subscription of three hundred thousand pounds, to pay off the national debt, the interest of which sum to be paid the subscribers, subject to certain terms of redemption, be not in reality a private bank, as those of England and Scotland, which are national only in name, being in the hands of particular persons, and making dividends on the money paid in by subscribers? [Footnote: See a Proposal for the Relief of Ireland, &c. Printed in Dublin A. D. 1734]

249. Qu. Whether the notes of this national bank should not be received in all payments into the exchequer?

270. Qu. Whether our visible security in land could be doubted? And whether there be anything like this in the bank of Amsterdam?
271. Qu. Whether it be just to apprehend danger from trusting a national bank with power to extend its credit, to circulate notes which it shall be felony to counterfeit, to receive goods on loans, to purchase lands, to sell also or alienate them, and to deal in bills of exchange; when these powers are no other than have been trusted for many years with the bank of England, although in truth but a private bank?

275. Qu. Whether the great evils attending paper-money in the British Plantations of America have not sprung from the overrating their lands, and issuing paper without discretion, and from the legislators breaking their own rules in favour of themselves, thus sacrificing the public to their private benefit? And whether a little sense and honesty might not easily prevent all such inconveniences?

282. Qu. Whether it must not be ruinous for a nation to sit down to game, be it with silver or with paper?
283. Qu. Whether, therefore, the circulating paper, in the late ruinous schemes of France and England, was the true evil, and not rather the circulating thereof without industry? And whether the bank of Amsterdam, where industry had been for so many years subsisted and circulated by transfers on paper, doth not clearly decide this point?
284. Qu. Whether there are not to be seen in America fair towns, wherein the people are well lodged, fed, and clothed, without a beggar in their streets, although there be not one grain of gold or silver current among them?
285. Qu. Whether these people do not exercise all arts and trades, build ships and navigate them to all parts of the world, purchase lands, till and reap the fruits of them, buy and sell, educate and provide for their children? Whether they do not even indulge themselves in foreign vanities?
286. Qu. Whether, whatever inconveniences those people may have incurred from not observing either rules or bounds in their paper money, yet it be not certain that they are in a more flourishing condition, have larger and better built towns, more plenty, more industry, more arts and civility, and a more extensive commerce, than when they had gold and silver current among them?

Whether, in defect of able missionaries, persons conversant in low life, and speaking the Irish tongue, if well instructed in the first principles of religion, and in the popish controversy, though for the rest on a level with the parish clerks, or the school-masters of charity-schools, may not be fit to mix with and bring over our poor illiterate natives to the Established Church? Whether it is not to be wished that some parts of our liturgy and homilies were publicly read in the Irish language? And whether, in these views, it may not be right to breed up some of the better sort of children in the charity-schools, and qualify them for missionaries, catechists, and readers?
312. Qu. Whether there be any nation of men governed by reason? And yet, if there was not, whether this would be a good argument against the use of reason in public affairs?

295. Qu. Whether, therefore, it would not be highly expedient if our money were coined of peculiar values, best fitted to the circumstances and uses of our own country; and whether any other people could take umbrage at our consulting our own convenience, in an affair entirely domestic, and that lies within ourselves?
