# International Cleaner Production Cooperative

The International Cleaner Production Cooperative is an Internet resource (<http://es.epa.gov/cooperative/ international>) that was implemented to provide access to globally relevant information about cleaner production and **pollution** prevention to the international community. The site is hosted by the U.S. **Environmental Protection Agency** and gives access to a consortium of World Wide Web sites that provides information to businesses, professional, and local, regional, national, and international agencies that are striving for cleaner production. The cooperative provides links to people and businesses involved with cleaner production and pollution prevention, and to sources of technical assistance and information on international policy. The **United Nations Environment Programme** (UNEP) is one of the primary members of the cooperative.
