John Robinson Pierce

1910-

American electrical engineer who has been called the "father" of communication satellites for his research into passive and active satellites in synchronous and non-synchronous orbits. His work influenced the launch of the first NASA satellite, *Echo 1,* as well as that of the first active relay satellite, *Telstar.* Pierce has won numerous awards for his satellite work, including the National Medal of Science. He has also researched psychoacoustics and computer-generated music.
